

Elect Jonathan Schuman Soil and Water District Group 4 on Nov 6th (County-Wide)

Endorse by: Brevard Federation of Teachers and NOW

We need to achieve: Environmental Sustainability!

- The ocean, lagoon, lakes, soil, fresh water must allow all people to live well, now and in the future.
- Currently, oceans, landfills, lagoons, lakes and rivers cannot handle our waste. There are now floating islands of garbage.
- Waste is washing up on our beaches daily and wildlife is in decline.
- Sewage and runoff of fertilizer, transportation products, and septic systems is making our ground water toxic.
- The ability of our local environmental systems to handle the waste alone is now over.

We know we are do better than this by including sustainability in our projects and adjusting our methods for handling our waste.

I Will:

- **work to lessen negative environmental effects.**
- support growth in our community without weakening our local environment.
- **support our greatest resource, the people of our community.**
- Assist land owners in their efforts to secure financial assistance through Farm Bill Support programs implementing conservation practices and saving money.
- Provide information to our community through conservation education, and programs.
- Assist growers with development of low volume irrigation systems.
- Provide input in developing and update irrigation water management plans.

Paid for by: Citizens to Elect Jonathan Schuman

- Review soil surveys and historical maps.
- **Provide local government advice and assistance regarding development and resource protection.**
- **Support youth education on sustainability**
- Support eradication of invasive plant species

I am Jonathan Schuman
